

Voice-Based Concept Understanding Analyser (VBCUA)

Target Concept Topic: Database Normalization

1. Fluency & Acoustic Performance Metrics

Metric Category	Measured Value
Total Speech Duration	29.05 seconds
Silence / Pause Ratio	0%
Acoustic Energy Density (RMS)	0.1131

2. Automated Speech Transcription

Sample speech transcript.

3. Semantic Concept Analysis Evaluation

Semantic Match Score: 60%

Comprehension Classification: Moderate Understanding

AI Insight Assessment: Acceptable explanation base. Try incorporating richer field terminologies and minimizing conversational pause voids.

4. Speech Amplitude Signal Waveform
